

# Case Study - what do I include?

## Title page:

- Title, name, class, teacher, cover photo.

## Contents page:

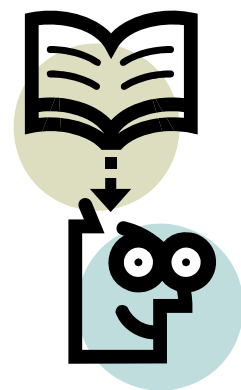

- Sections of your case study and which page they are on. (Leave till the end)

## Introduction:

- Explanation of what the case study is about and how the report is structured.

## Scientific theory:

- Relevant background science including
  - What is cloning?
  - What are genes, DNA and chromosomes?
  - How do you clone something?
  - What cloning has been done already?
  - Explain the 2 types of cloning (therapeutic and reproductive).
  - What are 'natural' clones?

And any other information you come across about cloning.

## Evidence:

- Arguments why cloning humans **should** be allowed.
- Arguments why cloning humans **should not** be allowed.

## Conclusion:

- Write a conclusion explaining what you have decided and why.

## Bibliography:

- References listing in detail where you got your research from. (copy every website address you go to at the end of the document).

## Presentation:

- Report clearly organised into appropriately headed sections and in a suitable sequence
- Report includes diagrams, data tables, graphs and good SPAG.
